INFINITE GALLERY

Art in virtual Reality

Move forward

Send your paintings into the Gear VR Headset and provide your clients with a virtual ride into the future of art.

With an original program

We developed the infinite Gallery inside Unity, the most reliable VR development software in the industry.

Where viewers Explore in VR

We'll allow the viewer to step inside the painting and for as long as wished, they'll explore a world created by the artist's mind.

And sell them directly there

We set up your preferred currency exchange program inside VR and begin selling directly from home.

Results

- Move to the future
- Connect with more artists
- Reach more viewers
- Sell more.
